

# RAJASHEKHAR AMARAPPAGOL

Web Developer & System Designer | HTML, CSS, Firebase & AI-Assisted Stack

Vijayapura / Bengaluru, Karnataka | +91 6366052864 | rajashekhar.exe@gmail.com

LinkedIn: [linkedin.com/in/rajashekhar-exe](https://www.linkedin.com/in/rajashekhar-exe) • GitHub: [github.com/rajashekharexe](https://github.com/rajashekharexe) • Portfolio: [rajashekhar-portfolio-iota.vercel.app](https://rajashekhar-portfolio-iota.vercel.app)

## PROFESSIONAL SUMMARY

Final-year BCA student passionate about designing systems and building clean, responsive web applications. With strong foundations in HTML, CSS, Firebase, and MongoDB, I lead end-to-end system architecture, database schema design, and user interface workflows. I leverage Google Antigravity as an AI pair-programmer to implement modern React, TypeScript, and Three.js components, taking full ownership of rigorous debugging and state management to bring projects into production. Shipped multiple live projects deployed on Vercel and Firebase; secured 4th place out of 69 teams at IEEE AI Arena 2.0. Seeking a Web Development or Full-Stack Internship to build reliable software alongside experienced engineers.

## TECHNICAL SKILLS

**Core & Languages (Hands-on):** HTML5, CSS3, JavaScript (Basics), Python (Basics), SQL

**Backend & Databases (Hands-on):** Firebase (Firestore, Authentication, Hosting), MongoDB, REST APIs, System Architecture

**AI-Assisted Frameworks:** React.js, TypeScript, Next.js, Tailwind CSS, Three.js / React Three Fiber (Built with Antigravity)

**Developer Tools & Platforms:** Google Antigravity, Git, GitHub, VS Code, Vercel

## TECHNICAL PROJECTS

### Apex — AI-Powered Career Planning Platform

*React Three Fiber, TypeScript, LLM APIs, GSAP*

- Designed end-to-end system architecture & UX for a 3D career roadmap platform synthesizing adaptive 30-day curriculums via LLMs.
- Leveraged Google Antigravity to build interactive 3D visual environments in React Three Fiber; tuned geometry instancing to sustain 60 FPS.
- Debugged complex streaming responses and component state across multiple views, resolving UI latency across 50+ iteration cycles.

### KAD Multiplier (Soil Multiplier) — Full-Stack E-Commerce

*Firebase Firestore, Authentication, React, Tailwind*

- Architected database schemas, security rules, and customer checkout flows for a live agricultural e-commerce application.
- Configured real-time Cloud Firestore snapshot listeners to synchronize product catalogs and inventory levels without manual page reloads.
- Implemented secure Firebase Authentication and fine-grained database rules to safeguard customer orders and transactions.

### Developer Portfolio — 3D Interactive Web Application

*Google Antigravity, React, TypeScript, Three.js, Vite*

- Designed and deployed a personal portfolio featuring interactive WebGL particle systems, responsive canvas shaders, and a terminal emulator.
- Achieved a 95+ score on Google Lighthouse audits through aggressive code-splitting, asset compression, and deferred bundle loading.
- Engineered fluid micro-interactions and smooth spring physics with Framer Motion across mobile and desktop viewports.

## ACHIEVEMENTS & AWARDS

### 4th Place (out of 69 Teams) — IEEE AI Arena 2.0 (Inception)

*IEEE BLDEA CET Vijayapura | Mar 2026*

- Built & shipped an AI educational web app under strict hackathon constraints; judged in the top 6% on architecture and UX.

### Academic Distinction in Computer Science — Class 12 (PUC)

*V B Darbar PU College | 2024*

- Secured 95/100 in Computer Science with an 81% aggregate score, demonstrating strong foundations in programming and databases.

## EDUCATION & COURSEWORK

### Bachelor of Computer Applications (BCA)

*Expected 2027*

A S Patil College of Commerce (Autonomous), Vijayapura

- Relevant Coursework: Full Stack Development (REST APIs, Web Security), NoSQL Databases (MongoDB), Data Structures, SDLC.

### AI / Machine Learning Certification

*Digital Dreams Institute, Vijayapura | 2026*
